

Proširena stvarnost Augmented Reality (AR)

Dr Nenad Gligorić

Šta je Augmented Reality?

- Termin Augmented Reality prvi put se pominje 1990 od strane istraživača u Boingu
- Augmented Reality su nazivali aplikaciju koji su nosili tehničari da bi im prilikom popravki bio vidljiv raspored kablova na ekranu

Šta je Augmented Reality?

- ...je stvaran (realan) svet proširen sa kompjuterski generisanim podacima i objektima..

Šta je Augmented Reality?

Primena

- 2.1 Archaeology
- 2.2 Architecture
- 2.3 Art
- 2.4 Commerce
- 2.5 Construction
- 2.6 Education
- 2.7 Search and rescue
- 2.8 Everyday
- 2.9 Gaming
- 2.10 Industrial design
- 2.11 Medical
- 2.12 Beauty
- 2.13 Spatial immersion and interaction
- 3.1 Military
- 3.2 Navigation
- 3.3 Office workplace
- 3.4 Sports and entertainment
- 3.5 Task support
- 3.6 Television
- 3.7 Tourism and sightseeing
- 3.8 Translation

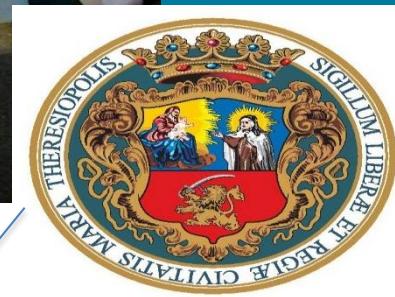

ARfie

Marker based 2D model – orthogonal position marker dependent after triggering

Marker based 2D model – parallel position marker dependent after triggering

Subotica this is me

AR Custom Apps for Wines

List of wineries, wine information, wine selling points, wine ordering option, AR recognition of wine labels

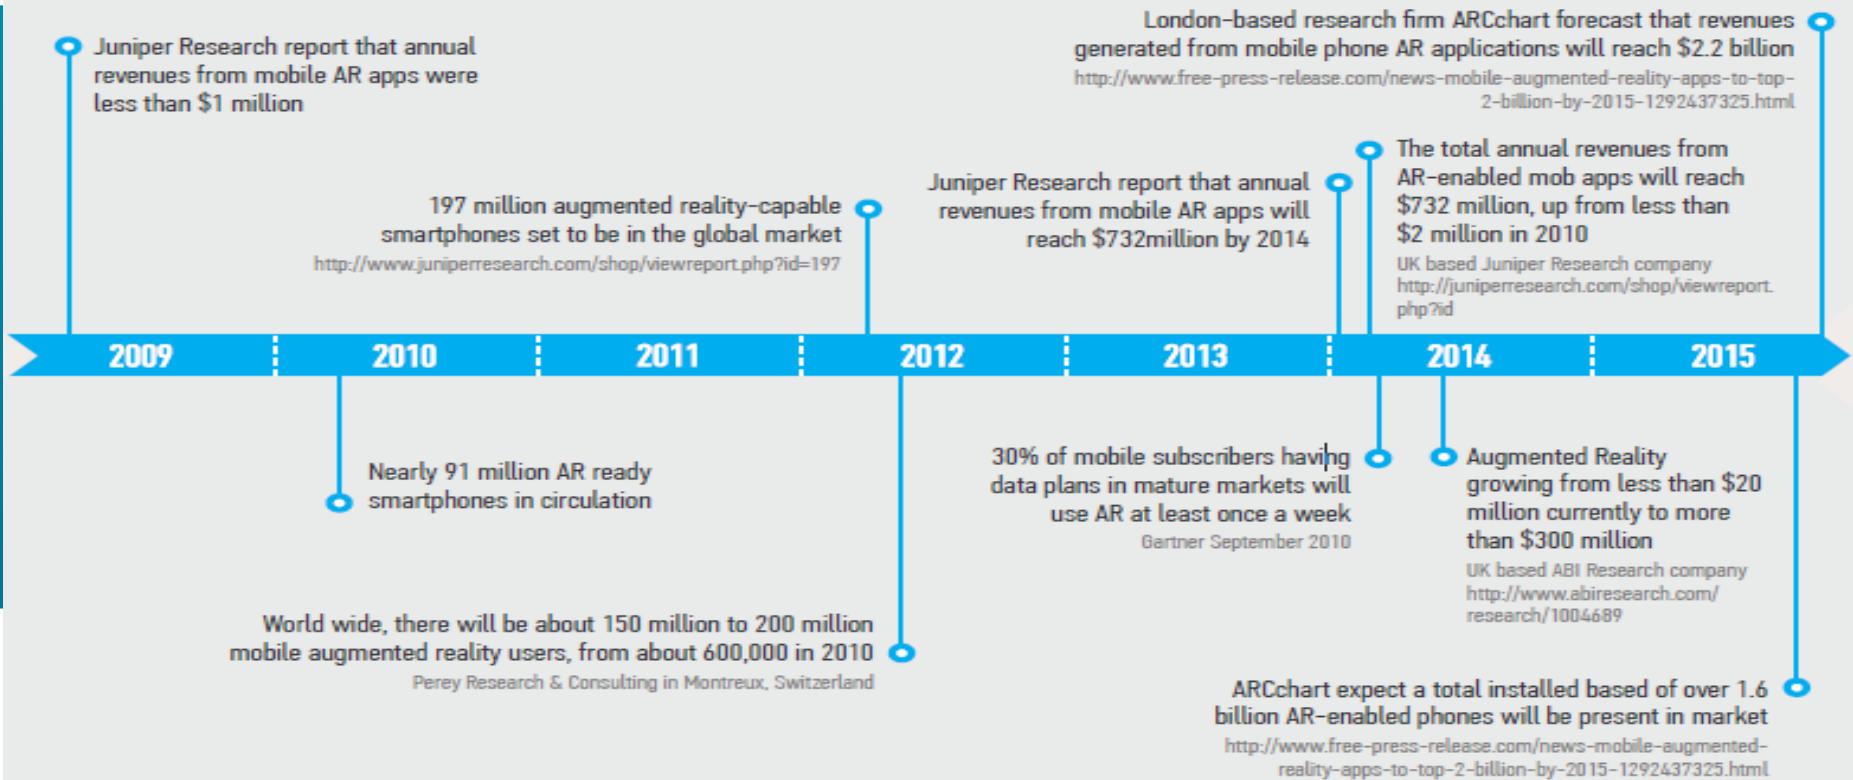

vinAR

Alat koji omogućava brzo i jednostavno kreiranje AR aplikacija za različite platforme

AUGMENTED REALITY ON THE MOVE...

Šta je sledeće?

Google naočare

- Trenutno u beta fazi.
- Pomeranje informacije sadržane u pametnom telefonu u realan svet.

Šta je sledeće?

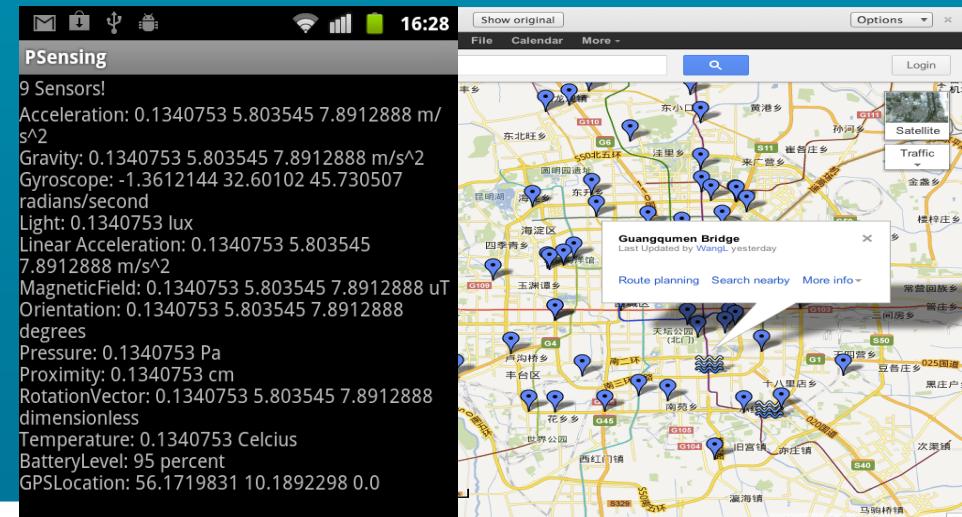

Digital head

New York University photography professor Wafaa Bilal displays the digital camera mount implanted in the back of his head in December 2010. Images from his camera have been streamed over the Internet, but Bilal's body has had problems accepting the implant. REUTERS/Jessica

Battery level
GPS location
Camera

...crowdsourcing

Šta je sledeće i šta su prepreke?

Šta je sledeće:

- Google Glass + FB = Augmented Reality društvena mreža?
- Google Glass + Digital Head = ?
- What's your match?

Kako:

- Algoritmi za mašinsko učenje
- Veliki broj konteksta koji se detektuje
- Internet of things

Terminator, 1984

Prepreke:

- Nedostatak algoritama
- Privatnost
- Cena uređaja (Google Glass ~ 2000E)

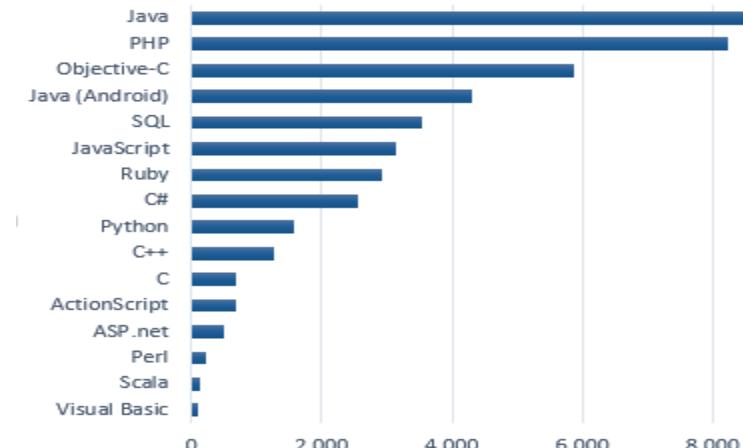

A gde sam tu ja?

WHAT IS IN IT FOR ME?

Potražnja tržišta

- Svetlo trojstvo (najtraženiji) Php, Java, C# (.NET) u Srbiji
- Baze podataka, web servisi
- 2 načina:
 - Nauči sam
 - Nauči sam
- Odakle?
 - Skripte, knjige, fakultet, tutorijali, obuke, kursevi

Obuke

- Hackathons
- senZations'15 summer school
<http://senzations.net/>
 - Ove godine održava se u Beogradu (početak septembra)
 - SocioTal Hakaton (nagradni fond 15000 EUR)
 - Rad sa “IoT hardverom” i programiranje

SOCIOTAL

Title: SOCIOTAL

Proposal Number: 609112

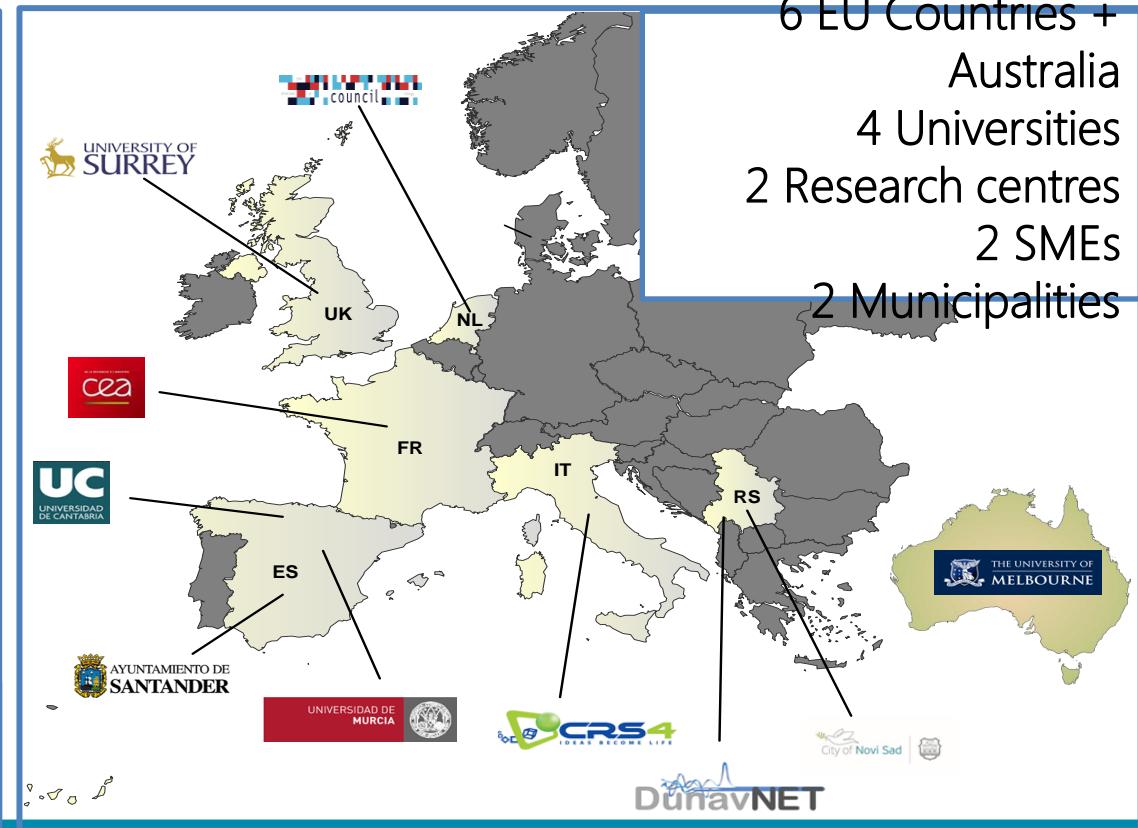

Duration: 36 months

Person effort: 327 PM

Total costs: 3.687.867 €

EC contribution: 2.811.000 €
Coordinator:

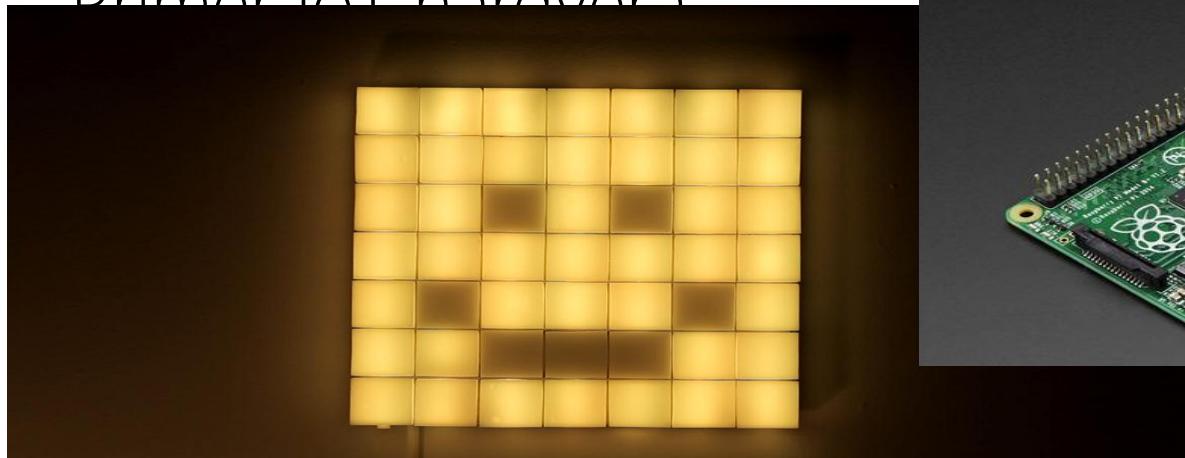

Dr Alexander Gluhak,
University of Surrey

IoT Lampa

- City “mood meter” & elevator supervisor

Primer IoT hardware

FP7 SOCIOTAL - <http://www.sociotal.eu>
