JS Programmer

Front End Developer

About Piktogram Studio d.o.o.

Piktogram Studio is small firm with big clients. We are specialized in work on challenging pieces of code. We are using the power of advanced programming and synergy with different technologies to achieve fast and stable solutions. What is most important, very good looking solutions.

Position Description

Development of the frontend code (JS) for custom WordPress and MOODLE plugins in tight cooperation with web designer (HTML, CSS) and backend developer (PHP).

Development of WebGL and Cordova cross platform applications.

Working time: 6 hours per day in Belgrade office. Flexible start.

Duration: 3 months

Salary: no salary.

No stress, no agile, no deadlines... Full zen environment.

Requirements

1. JS (knowledge and strong understanding of basic JS, no libraries like jQuery, pure JS)
2. Strong understanding of HTML and CSS
3. English language (basic conversation)

Will learn

1. WordPress and MOODLE plugin development
2. Advanced NetBeans
3. WebGL
4. Apache Cordova

Will get

1. Strong references on domestic and international projects
2. Mentoring
3. Experience on small and enterprise projects
4. Money award for winning competitive tasks
5. Certificate for your faculty or school
6. Verified list of references
