Location: Belgrade

Responsibilities:

- Monitor and support mission-critical production systems 24x7.
- Set up development and production (physical or virtual) environments.
- Detect possible problems and proactively apply solutions.
- Optimize servers (Web, DB, Content, etc.)
- Maintain integrity of the network and ensure security of systems.
- Collaborate with global hosting companies in benchmarking and optimization of environments.
- Adapt and contribute to the escalation process.

Basic Requirements:

- Fluent in English (written and verbal communication skills)
- 1+ years in managing standard Web Application infrastructure
- Experience in installation, configuration and maintenance of virtual and physical environments.
- Excellent communicational and analytical skills
    - Technical experience with
    - Nagios, Munin
    - Apache, Nginx
    - MySql / Percona replication, multi-master and standalone setups
    - Varnish, MemCached
    - IPTables / Networking
    - Bash scripting

- CentOS, Ubuntu and OS X

PREFERENCES WILL BE GIVEN TO CANDIDATES WITH:

- Working knowledge of KVM, VmWare, Linux networking, VPN (OpenVpn, IPsec, PPTP), Postfix, NFS, Tomcat, LDAP, Redis, GIT/SVN/CVS
- Working knowledge of PHP / Java programing language
- Experience with SME Server, Amazon or Rackspace cloud
- University degree - technical sciences
- Willing and able to work nights, weekends and holiday shifts, and also to be on-call

WE OFFER:

- Competitive salary package
- Friendly, fun and open working environment
- Professional improvement through certifications and exposure to working directly with globally recognized brands/teams
