Wireless Media is a dynamic, innovative IT company. We design and develop our own web and mobile IT solutions, and partner with some of the most recognizable mobile brands and leading telecoms, in the region and worldwide. Our company culture encourages creativity and promotes leadership, entrepreneurship and audacity.

We have a job opening for the position of

Senior UX Designer

You are a creative person with experience in developing creative solutions and concepts. You understand customer needs and consider them thoroughly before making design decisions. You have experience in working with colleagues who think fast and work even faster. From the first day you will be motivated to learn, to get to know the projects through communication with colleagues from other teams, to follow and apply innovations in the world of web and app technologies and share new knowledge and ideas with other team members.

Responsibilities:
- Understanding user psychology and developing solutions based on it
- Produce flows, wireframes, storyboards, interaction scenarios and providing feedback to the Product and Design teams
- Understanding user functionality testing and providing wireframes/storyboarding with proposed A/B testing
- You have strong examples of how your visual and interaction designs have made impact
- Collaborate comfortably with other teams in order to bring your ideas to life
- Negotiate for the best UX without be dogmatic
- Leading user experience design tasks on projects
- Mentoring junior UX designers and practitioners
- Participating actively in design reviews for others' work

You are:
- A team player, eager to help your colleagues as they will help you
- A problem solver with a curious personality and a keen interest in following emerging UI/UX trends
- Experienced in applying UI/UX standards on at least one mobile platform
- You are grounded in a User-Centered Design philosophy
- You are addicted to defining user requirements and use cases that drive your design decisions
- You are not afraid to ask hard questions around how the software is making an impact in a user's workflow
- You are the user's advocate in the software development process throughout design, specification and user evaluation.
- You feel comfortable talking and working through problems with your teammates both in and outside of design.

It will be a considered advantage if you have
- Experience with designing for all three mobile platforms, Windows, iOS and Android

In return we offer:
- Full-time employment and competitive salary
- An opportunity to work with the latest mobile and web technologies
- Take part in complex, innovative projects for highly recognizable brands
- Clear development and career path
- Very attractive work environment in Belgrade, at a prime location

If you are interested to join our team you should send us examples of your resume and portfolio at posao@wm.rs

Candidates without portfolios will not be considered.
