

Manpower is a worldwide innovative forerunner and leader in the field of employment through the provision of services and workforce management solutions for clients and helping people in their career development with the aim of understanding the needs of the clients and candidates in the changing world of work.

Our client is an IT company working with clients in Nordic region within financial services industry. The team in Belgrade is a team of highly qualified and passionate people working in a dynamic and inspirational environment. The company believes that people are the most important asset and this conviction is reflected in their activities, culture and performance management. On behalf of the client, Manpower Serbia is searching for a motivated candidate to take the challenge and to successfully fill the position of:

.NET/Web Developer

(Location: Belgrade)

Job Description:

- Working as a developer in the Agile/SCRUM projects, you will plan and coordinate your own tasks and collaborate closely with specifications, test and documentation counterparts to maintain existing or develop new features and solutions in a team effort
- You will get the opportunity to work on the newest Microsoft technology for large customers with numerous and highly varying tasks across our product as well as working with new initiatives around Service Oriented Architecture, Azure and Silverlight/HTML5/Javascript based smart front-ends.
- Working with colleagues across the organization to interpret customer requirements and turn them into strong software design specifications
- Develop core functionality meeting the requirements and contribute to expanding the standard functionality of our product
- Contribute to maintaining and adjusting the existing product functionality
- Participate in various projects and development groups

Candidate Profile:

- Minimum 3 years of experience of extensive commercial .NET and C# development experience and working knowledge of SQL Server, within the financial domain as a plus
- Experience in web application development using Silverlight and/or ASP.NET / HTML5 / Javascript
- Extensive experience with high level analysis of customer requirements and translating these into professional specifications and software design
- As a person you are self-driven, taking initiatives and have a structured way of thinking. You focus on quality and take pride in observing agreements and deadlines. You are an inspiring team player who can work in an independent and dedicated manner when required
- University degree in electrical/computer engineering or computer science
- Fluent in both written and spoken English coupled with excellent verbal and written communication skills

Company offers:

- Excellent, highly stimulating working environment
- Participating in large implementation projects for international customers
- Ability to travel abroad
- Encouragement of innovation and support in personal and professional growth
- Very competitive salary based on experience and qualification
