

12Rockets

12Rockets Mobile Studio is a subsidiary of PSTech, a software development firm employing 300+ engineers. Our development team is located within PSTech, and we are currently working on opening a sales office in San Francisco.

At 12Rockets, we combine years of experience from working on complex software projects with a passion for crafting high quality and impactful mobile applications. Our team is a carefully curated collective of designers, developers, thinkers, and makers all of whom share the same dedication to crafting outstanding mobile experiences.

Mobile Engineer

12rockets studio is looking for an individual that would lead our engineering team.

Project description:

As a Mobile Engineer you will be responsible for the development of apps that embody 12Rockets' commitment to building excellent products, thus we expect you to be an expert in mobile development. You will be responsible for ensuring that our apps possess the highest quality, that they are easily maintainable, robust and designed to function consistently well across numerous devices and network conditions.

While producing great looking and functional apps is a must, we are looking for an individual willing and able to go beyond that. We want our apps to impress. They should be something people will admire and that will make us proud years from now.

Job Responsibilities:

Qualified candidates will participate in designing and building Android and/or iOS mobile applications, and will be responsible for:

- Writing high-quality, maintainable, and robust mobile apps is the primary task
- Working with Clients, Development Managers, UI/ UX Designers, and other key business stakeholders
- Involvement in daily scrum meetings, sprint deliverables, unit testing, peer testing, and everything it takes to deliver a high quality product to our customers

Mandatory skills:

- Established background in designing and building software products
- Good communication skills and the motivation to achieve results in a fast paced environment
- 3+ years of industry experience, out of which at least 1 year in mobile app development
- Excellent object oriented analysis and design skills (OOA/OOD)
- Proficiency in one or more of the following languages/platforms: Java / Android SDK, Objective-C / iOS platform
- Ability to translate concept designs into user interfaces on mobile devices
- Strong sense of ownership, urgency, and drive

Desirable skills:

- Experience in developing for agile companies/projects
- Experience in continuous integration and continuous delivery

If you are interested in this position and you have the required qualifications, please send your CV via email to posao@pstech.rs. Please note that we will only contact those candidates that are selected for an interview. Thank you.
