

PSTech is hiring mobile engineers for 12Rockets, our new mobile design and development studio. 12Rockets is a subsidiary of PSTech, a software development firm employing 300+ engineers. Our development team is located within PSTech, and we are currently working on opening a sales office in San Francisco.

12Rockets

At 12Rockets, we combine years of experience from working on complex software projects with a passion for crafting high quality and impactful mobile applications. Our team is a carefully curated collective of designers, developers, thinkers, and makers all of whom share the same dedication to crafting outstanding mobile experiences.

12rockets studio is looking for an individual that would lead our engineering team.

Lead Mobile Engineer

As a Lead Mobile Engineer you will be responsible for the development of apps that embody 12Rockets' commitment to building excellent products, thus we expect you to be an expert in mobile development. You will be responsible for ensuring that our apps possess the highest quality, that they are easily maintainable, robust and designed to function consistently well across numerous devices and network conditions.

While producing great looking and functional apps is a must, we are looking for an individual willing and able to go beyond that. We want our apps to impress. They should be something people will admire and that will make us proud years from now.

The ideal candidate must have an established background in designing and building software products, excellent leadership and communication skills and the motivation to achieve results in a fast paced environment.

Qualifications:

- 5+ years of industry experience, out of which at least 2-3 years are in mobile app development.
- Excellent object oriented analysis and design skills (OOA/OOD).
- Ability to translate concept designs into user interfaces on mobile devices.
- Proficiency in one or more of the following languages/platforms: Java, Android SDK, Objective-C or the iOS platform.
- 3+ years of experience developing for agile companies/projects.
- Experience in continuous integration and continuous delivery.
- Strong sense of ownership, urgency, and drive.

Job Responsibilities:

- Writing high-quality, maintainable, and robust mobile apps is the primary task.

- Working with Clients, Development Managers, UI/ UX Designers, and other key business stakeholders.
- Involvement in daily scrum meetings, sprint deliverables, unit testing, peer testing, and everything it takes to deliver a high quality product to our customers.
- Providing technical leadership and guidance on plans and delivery commitments.
- Translating the needs of the product and business to ensure they are aligned with team priorities.

If you are interested in this position and you have the required qualifications, please send your CV via email to posao@pstech.rs. Please note that we will only contact those candidates that are selected for an interview. Thank you.
