

Manpower is a worldwide innovative forerunner and leader in the field of employment through the provision of services and workforce management solutions for clients and helping people in their career development with the aim of understanding the needs of the clients and candidates in the changing world of work.

Our client is PRODYNA, an innovative consultancy and software company, specialized in the development of complex business and web applications and headquartered in Frankfurt, Germany. We are looking for intelligent, hard-working, passionate software engineers interested in working on large-scale, international IT projects and motivated to take the challenge and to successfully fulfill the position of:

LINUX SYSTEM ENGINEER

(Location: Belgrade)

Job Description:

- ✓ Perform regular system checks and monitoring, troubleshooting, installation and administration of client-server systems
- ✓ Perform installation and administration of virtual infrastructure, Java and non-Java (Web)-applications
- ✓ Perform 1st/2nd Level IT-Support
- ✓ Maintain asset Management (Hardware/Software)
- ✓ Execute backup and recovery
- ✓ Develop and maintain comprehensive documentation for multiple application environments
- ✓ Be part of an agile team working closely on various projects for clients in Germany, Austria and Switzerland

Candidate Profile:

- ✓ Minimum 2 years of experience with Linux system administration
- ✓ Experience with JBoss, SVN/Git, Jenkins/Maven, Nexus, development infrastructure in general is a plus
- ✓ Experience with system and configuration management (e.g. puppet, chef or cfengine) is also a plus
- ✓ Must be able to determine when a server is in a "distressed" state, e.g. network performing badly, short of swap space, short of RAM, overloaded CPU, over-loaded I/O subsystem. Understand how to gather more information and recommend a solution
- ✓ Minimum 2 years of experience working with Windows Client and Server OS
- ✓ Some scripting experience, specifically with Python, Perl and bash
- ✓ Some knowledge of the Apache Tomcat and Apache HTTPD
- ✓ Some knowledge of network administration/management (routing protocols, IPv4/IPv6, network device configuration)
- ✓ Some knowledge with security administration/management (firewalls, Intrusion prevention, vulnerability scanning, patch management, server hardening)

- ✓ Knowledge of backup and recovery methods
- ✓ Be a team player and willing to learn new things (independently and with a mentor)
- ✓ Demonstrate methodological, analytical and structured thinking and be able to work independently
- ✓ Excellent command of English language (written and spoken)
- ✓ University degree in computer science (or equivalent)

Company offers:

- ✓ A perspective for professional development through annual career plans
- ✓ An extensive concept of further training, individually adjusted to you
- ✓ Procedures according to internationally recognized standards
- ✓ You will work in experienced System engineer teams and will learn first-hand from our experts
- ✓ An exciting working environment which is characterized by teamwork
- ✓ Very good working equipment and atmosphere
- ✓ Numerous and varied employee events
