Android Developer

Endava is a privately owned IT services company with over 3,400 employees and offices in New York, Atlanta, New Jersey, London and Frankfurt and 6 delivery centers across Romania, Moldova, Macedonia, and Serbia. We strongly believe that our ability to deliver quality work while adapting easily and quickly to the evolving needs of our customers and people ensures our success. To support our core purpose of enabling our people to be the best that they can be, we invest in career development and building a strong learning culture within Endava.

Consider a new opportunity

As a Senior Android Engineer you will work with the products used by millions of people - from system apps for one of the biggest Android vendors, via beacon management and applications built on top of BLE technology, to the innovative solutions in medical industry. You will have possibility to work as a part of an agile mobile team usually together with a client bringing high quality solutions to production. You will have opportunity to promote and display initiative and innovation.

- Work with latest features of Android SDK as a part of the mobile team
- Write high-quality code, conduct and participate in code reviews, and follow strong engineering principles and standards
- Research the technical feasibility of new ideas and actively suggest technology improvements
- Cooperate closely with Quality Assurance, Product Owners, and other mobile as well as backend engineers
- Support and coach less experienced team members
- Manage day to day cooperation with clients from top technology companies
- Enjoy the pleasant working environment, have fun and play
- Take full ownership of your career and benefit from our development opportunities
