

## Android Application Developer

### Company Introduction

Innotech Global was founded with one goal – to become the leader in the field of business while providing our clients with high quality solutions to suit their needs. We're a dynamic team of young professionals ready to tackle any challenge client's ideas throw at us. With an executive team who has more than 50 years of combined experience, we have taken the knowledge we gained working for others and have created our own business. We want to innovate the way people do business with our offerings of mobile phones, software development, web and mobile applications and interactive display technologies.

Our company ethics are something that we're very focused on. Respect the customer and his needs. Be respectful towards your coworkers. Solutions that we offer will always be of high quality and reliability. Strive to learn something new and improve yourself.

### Job Description

*Our office in Belgrade is looking for an Android developer responsible for the development and maintenance of applications aimed at a vast number of diverse Android devices. Your primary focus will be the development of Android applications and their integration with back-end services. You will be working along-side other engineers and developers working on different layers of the infrastructure. Therefore, commitment to collaborative problem solving, sophisticated design, and creating quality products is essential.*

### Responsibilities

- *Translate designs and wireframes into high quality code*
- *Design, build, and maintain high performance, reusable, and reliable Java code*
- *Ensure the best possible performance, quality, and responsiveness of the application*
- *Identify and correct bottlenecks and fix bugs*
- *Help maintain code quality, organization, and automatization*

- Monitor bug resolution efforts and track success.
- Participate in product design reviews to provide input on functional requirements, product designs, schedules or potential problems.
- Collaborate with other team members and stakeholders.

## Skills And Qualifications

- Be a self-starter, have strong communication skills, and have a high degree of follow through regarding completing their assignments.
- Strong knowledge of Android SDK, different versions of Android, and how to deal with different screen sizes
- Familiarity with RESTful APIs to connect Android applications to back-end services
- Strong knowledge of Android UI design principles, patterns, and best practices
- Experience with offline storage, threading, and performance tuning
- Ability to design applications around natural user interfaces, such as "touch"
- Familiarity with the use of additional sensors, such as gyroscopes and accelerometers
- Knowledge of the open-source Android ecosystem and the libraries available for common tasks
- Ability to understand business requirements and translate them into technical requirements
- Familiarity with cloud message APIs and push notifications
- A knack for benchmarking and optimization
- Understanding of Google's Android design principles and interface guidelines
- Proficient understanding of code versioning tools, such as Git
- Familiarity with continuous integration
- University Degree (Computer Science, Mathematics or equivalent).

## Requirements

- Location Belgrade
- Full time job availability
- English language knowledge for communication purposes with other team members
- Availability to work over-time (or in shifts) due to time zone difference
- At least 1 year experience in working environment
