With over 15 years of experience in the area of software development we have established long-term relationships with our clients. They trust our decisions and value our propositions. During the last two years we have grown from 140 to over 250 great people and we keep going. Join one of the biggest software development companies in the region and become a member of our daily-growing team.

Our clients are world leaders in their business areas. Our projects include object oriented software development, database design and mobile platforms. Also, our functional and performance testing expertise is highly valued by our clients. Our core values: partnership, innovation and respect, represent our business approach so as our employee focus.

Due to strong demand for our services, we are looking for:

Android Development Team Lead

As an Android Development Team Lead you will be responsible for both hands-on software development and for leading a team of engineers who are working for one of the biggest Android phone manufacturers in the world. You will participate in the design and implementation of new functionalities for the Android operating system shipped with millions of phones and it will be your responsibility to create the killer and best-in-class mobile experience for millions of users. You will make sure that we have on time, quality releases, that the team is happy and efficient and that customers are satisfied with us.

The ideal candidate will have an established background in designing and building software products, excellent project management and leadership skills, great communication skills and the motivation to achieve results in a fast paced environment. Responsibilities include assisting in hiring, developing, mentoring and managing a team of software development engineers. This position reports to the Department Manager.

Job Responsibilities:

- Writing high quality code and performing code reviews for the rest of the team
- Providing technical leadership and guidance on project plans and delivery commitments
- Manage the day-to-day activities of an engineering team. Project planning, milestones/deadlines date definition, task estimation, scope of work assessment, etc.
- Organization and overseeing team communication with clients: live meetings, email correspondence, reporting, etc.
- Participating in recruitment process, providing input for performance appraisals

Desired Skills and Experience:

- 2+ years in leadership/management role, 5+ years of software development experience building and scaling applications
- Strong technical background in Java and hands-on experience with Android application development
- Experience with a variety of software development processes, and ability to apply the right process for the project
- Proven ability to build productive relationships and motivate team members. Must have a positive, can-do attitude.
- Demonstrated track record of successfully hiring, motivating, retaining and effectively deploying talented software developers to perform against aggressive delivery goals.
- Excellent communication skills. Experience in communication with remote partners
- Ability to travel abroad

If you are interested in this position and you have the required qualifications, please send your CV via email to posao@pstech.rs. Please note that due to large number of applications we receive, we will only contact those candidates that are selected for an interview. Thank you.
