Esokia is an international digital agency created in 2008 in Mauritius. Today, Esokia counts 200 collaborators between 4 production centers (headquarters in Mauritius, Serbia, Madagascar and Costa Rica) and has a commercial presence in Paris as well. We assist companies in their digital transformation and we develop all the required mediums: e-commerce websites, corporate websites, social networks… iOS, Android and Windows Phone mobile applications. We use the most innovative technologies and we also assist companies in their web marketing strategy and actions.

For more information, please visit our website: www.esokia.com

We are always on a hunt for ambitious, curious, and enthusiastic individuals with design and coding experience, who can carry ideas/concepts through the analyzes and evaluation, then develop, test, deploy and support complex software systems.

Open position:

Angular JS Developer

Location: *Belgrade, Serbia*

About your role:

We are looking for an AngularJS Developer responsible for the client side of our service. Your primary focus will be to implement a complete user interface in the form of a mobile and web app, with a focus on performance. Your main duties will include creating modules and components and coupling them together into a functional app. The artistic design will be delivered to you, together with a few HTML templates, but we will ask for your help in regard to animations, CSS, and final HTML output.

Responsibilities:

- Delivering a complete front end application
- Ensuring high performance on mobile and desktop
- Writing tested, idiomatic, and documented JavaScript, HTML and CSS
- Coordinating the workflow between the graphic designer, the HTML coder, and yourself
- Cooperating with the back-end developer in the process of building the RESTful API
- Communicating with external web services

Your profile:

- Proficiency with JavaScript and HTML5
- Deep knowledge of AngularJS practices and commonly used modules based on extensive work experience
- Creating self-contained, reusable, and testable modules and components
- Ability to provide SEO solutions for single page apps
- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system
- Validating user actions on the client side and providing responsive feedback
- Experience with building the infrastructure for serving the front-end app and assets
- Creating configuration, build, and test scripts for Continuous Integration environments

What's in it for you:

✓ Competitive salary package

✓ Great coworkers
✓ Flexible working hours and emphasis on employee work-life balance
✓ You can also work from home sometimes if you feel like that ;)
✓ Interesting projects
✓ Opportunities to grow within the company and expand your knowledge and skills
✓ Working with globally recognized brands

You are crazy about Angular JS technology, and you are ready to engage yourself for a full-time position?
Esokia is the right place for you!
Share your passion for digital! We want to work with more creators, innovators and builders. Don't you?

If you meet the requirements, submit your CV electronically.

*Please note that only short listed candidates will be contacted.
