

AppsSolution is a French based company (part of PureAgency group) with development center in Belgrade. We are specialized in every aspect of mobile application development which includes:

- * iOS and Android application development
- * Backend development with strong focus on mobile application context
- * State of the art designing, prototyping and UX
- * Mobile application SEO and marketing
- * Mobile CRM, RTB and campaigns

Our experience with large number of biggest European brands give us a competitive advantage when it comes to application development and thus making every project a new challenge for us. We are constantly searching for new talents and developers who are interested in working on large volume commercial applications, so let us know if you are interested - you may be the one we are looking for!

Requirements:

- University degree in computer science or relevant experience
- Minimum half year of experience as a native mobile application developer and at least one successful project on iOS platform
- Good knowledge of programming language Objective-C as well as associated frameworks and libraries
- Familiarity with application development methodology (primarily AGILE)
- Good knowledge of process and publishing standards in the App Store (having a published application in the App Store would be a plus)
- Good level of spoken and written English

We offer:

- Excellent working environment, with a friendly team of people
- Competitive salaries with possible stimulations
- Variety of interesting projects and clients
- Chance for a professional and personal development
- Permanent employment
