

**ASW Inženjering** is a domestic software company, with its headquarters in Belgrade, specialized in development and implementation of its own high quality software solutions, based on Java, .Net, Oracle and open source technological solutions.

ASW Inženjering has a leading position in the field of information systems and offers exceptional products and services. We develop software almost 25 years and use different cutting-edge technology to the satisfaction of our clients. The greatest wealth and asset of ASW are our employees. ASW is a place for professional development and learning.

We respect the opinions of our employees.

ASW and our clients highly respect constant effort of our employees to contribute with ideas and creativity in order to improve the products and services. ASW rewards the employee of the year and those who contribute the most to the development of products.

Professional development and constant learning

Above all, we appreciate the investment in knowledge. Products and services in question are very reliable, but also challenging and their continuous improvement demands constant professional development of all employees. The imperative is to be in touch with innovations in IT sector and that our employees and students in professional practice in ASW constantly learn and develop their skills. Learning program, as well as mentoring program guarantees success and quality. That is why we all work together to develop both professional and interpersonal skills. This is the opportunity that ASW offers to our employees and future colleagues.

Pleasant working environment

All our employees have the opportunities to participate in different sports activities (basketball, volleyball) and team building activities. We are not just people who work together but friends as well.
