For our team in Belgrade - Serbia, we are seeking:

UX/UI Designer (Data Analytics) (mf)

Location: Belgrade

Job Description:

We believe that all of our products should be beautiful and accessible. As a designer, you'll delight users with designs that inspire, engage and excite them. You'll rely on user-centered design principles to produce high-quality visuals—from concept to execution—across many platforms.

We are looking for the designer to support our Visualization Team, who will be responsible for researching, designing, and prototyping new user experiences based on product requirements. Candidates should possess exceptional visual and user interface design skills, as well as user-centered design principals. The applicant must have an affinity for consistency, color use, typography, and a keen eye for subtle details.

Key Skills and Experience:

- Previous work experience is necessary
- You have experience working across interaction, UI and graphic design, and have an interest in data visualization.
- You're passionate about design, telling product stories and solving problems for people.
- Expertise in creating prototypes and turning sketches and design mockups quickly into a something you can present to the rest of the team.
- Strong knowledge of, and experience with, user-centric design processes and methodology.
- Demonstrated comfort with an iterative design process that includes accepting (and giving) feedback and constructive criticism from other team members, as well as our customers.

- Outstanding written and verbal communication skills, and ability to present work to executives and large groups.
- Desire to learn new technologies. Innovative and proactive approach in work.

Desired (not required):

- Experience within agile environment (Scrum).
- Experience with BI tools (Tableau, Datameer, Pentaho etc.) and dashboard design.
- Experience designing and building products and features for mobile or desktop, native or web.
- Ability to adopt and understand corporate branding and brand guidelines.
- A portfolio with examples of interaction design work.

Education:

- Bachelor/Master degree in Design (e.g. interaction, graphic, visual communications, product, industrial), computer science, engineering, or a related field or equivalent practical experience.

We offer:

- Newest technologies.
- An interesting, diversified and challenging working environment in a highly motivated and international team.
- Our open company structure, with flat hierarchy and fast decision making, offers very good personal development perspectives.
- Flexible working conditions.

We are looking forward to meet.

Your convincing application documents should be sent via email. Resume should include photo and be in PDF format. Please indicate in which of the above mentioned fields you have special experience. List of references is very welcomed. In your cover letter please indicate for which position you are applying for, your fee expectation and earliest start date.

Documents should be in English.
