Job Description:

Our Analytics Data Engineering team in Sofia & Varna is looking for you!

We live in a data-driven world where data can be leveraged for reporting & analyses and for data-driven products and applications. Our strong traditions are in Analytics solutions and Data Engineering based on the latest cloud technologies.

Here you will gain hands-on experience working with world-famous brands and Fortune 500 companies in a diverse team where everybody has a lot to contribute with - including yourself! The team is constantly growing with over 60 experts in the field.

Learn from the best - join our Analytics Data Engineering team!

Role & Responsibilities:

• Analyzing, designing and implementing databases, information models and data pipelines.
• Building the code and logic required for optimal extraction, transformation, and loading of data from a wide variety of data sources using SQL or programming languages.
• Building analytics solutions that provide valuable insights for clients and end users.
• Work in an agile project team which has specific goals and deliverables.

Qualifications:

• 4+ years of relevant working experience.
• Experience with Azure Data Components, Synapse, Data Factory, Databricks.
• Experience with BI/ETL tools such as SSIS, Informatica, DataStage, Talend, Pentaho.
• Experience with Data Warehouse & Data Quality Tools.
• Experience with SQL, Transact - SQL or PL/SQL.
• Fluent English.

Experience considered as an Advantage:

• AWS
• Apache Spark or Databricks
• Python or other programming languages working with data
• Azure Data Engineer Associate certificate

What we offer:

• Competitive remuneration package
• 4 days additional paid leave (total:24 days)
• Company-paid trainings & certifications
• Medical insurance
• Life insurance
• Food vouchers
