

ManpowerGroup is a worldwide innovative forerunner and leader in the field of employment through the provision of services and workforce management solutions for clients and helping people in their career development with the aim of understanding the needs of the clients and candidates in the changing world of work.

On behalf of our client, leading IT company in developing Big Data technologies with focus on real estate, vehicle and travel markets with over 30 millions monthly users, ManpowerGroup Serbia is searching for an independent developer capable of delivering quality code to take the challenge and to successfully fill the position of:

DevOps and Operations Engineer

Location: Belgrade

Job description:

- Working with the Engineering team to maintain scalable systems that support high traffic web services and back-end tools and applications
- Involvement in projects to improve production infrastructure
- Involvement in performing and automating production deployments
- Proactive and extensive communication with co-workers and business partners, in both Serbia and the U.S.
- Participation in the 24x7, multi-tier on-call rotation (company maintain the effort to keep the out-of-working-hours events at a minimum, they promise!)

Candidate profile:

- DevOps mindset (you prefer: automation to doing things manually, metrics and logs to guessing, universal and flexible solutions rather than case-by-case ones, not to create technical debt, to continuously improve and evaluate processes you're a part of, to keep people in the loop on changes)
- 3+ years Linux administration experience (Red Hat and Ubuntu based distributions preferred; good knowledge of standard system tools such as awk, sed, grep, top, ps, lsof, cron and such)
- 1+ years prior experience supporting a LAMP environment, including nginx or HAProxy
- HTTP protocol knowledge (headers, status codes, troubleshooting, problem reproduction)
- General systems programming and scripting experience (Bash at minimum; Python, Ruby and Golang are a bonus), TCP/IP protocol knowledge is a bonus
- Ability to clearly communicate in both written and spoken English

Desired skills:

- Experience with containerization, including Docker, Kubernetes and/or Mesosphere
- Experience with public clouds, such as AWS
- KVM-based virtualization experience
- CI/CD experience
- PostgreSQL and MySQL administration with focus on high-availability
- Prior large scale systems management experience (load balancing, high-availability, multiple datacenters)
 - System automation and orchestration using tools like Chef and Rundeck
 - Java VM monitoring, tuning and troubleshooting

Company offers:

- Chance of working with a top-notch, experienced technical team spread across Serbia, the USA and Ukraine
- Flexible working hours and relaxed working atmosphere
- Many opportunities to acquire new technical skills and advance your career, as well as the opportunity to work with the latest technologies
- Free lunches daily, team activities, weekly recreation and seasonal team-building trips
- MacBook for every employee

ManpowerGroup is an Equal Opportunity Employer and considers applicants for all positions without regard to gender, marital status, national origin, age, creed, religion, race, color, ancestry, sexual orientation, physical or mental disability.

All applicants will be informed and shortlisted candidates will be invited for an interview.
