Front End Developer

Location: Belgrade, Makedonska 30
Company: Itekako D.O.O
Job type: Full time job

Since 2006, **Itekako** has been designing and building custom web and mobile software solutions for Tier 1 clients around the world.

We offer full-service front-end and back-end engineering services. Our areas of expertise include:
    *Streaming solutions
    *Mobile development (iOS, Android)
    *Enterprise application development
    *Embedded development for custom hardware platforms

We are looking for a software developer to fulfill the role of:

Front End Developer who will be responsible for developing applications in JavaScript, ensuring designs are consistent with specifications and assisting back-end developers in coding and troubleshooting.

Requirements:

1. 2+ years experience building websites and integrating front-end applications with back-end web services
2. Write clean, semantic markup and styles for websites in HTML5 and CSS3
3. Plan and maintain high-level front-end architecture of web applications
4. Proficiency with Subversion or Git
5. Experience with AngularJS and Knockout frameworks
6. Experience with altJS languages, including CoffeeScript, LiveScript or TypeScript, would be considered a bonus
7. Experience with Microsoft .NET web frameworks would be considered a bonus

We offer:

    *Prospect in a fast growing and successful company
    *Working on leading edge technology projects for US and EU market
    *Position in a friendly environment which is exciting and rich in variety
    *Being a part of a competent and highly motivated team
    *Long-term opportunities
    *Competitive salary
