WIRELESS MEDIA

Front End Developer

You have already worked on web based projects and have teamwork experience. From the get-go you will be motivated to learn new technologies, learn about wide array of projects, engage colleagues in other development teams, follow technical developments within your area of expertise, apply new knowledge to everyday tasks and share that knowledge with colleagues.

You should know:
- HTML5 and CSS3 (progressive CSS and media queries for displaying content on multiple screen resolutions)
- JavaScript and jQuery
- How to create functional HTML/CSS/JS web pages based on the static (Photoshop PSD) design

It will be considered advantage if you know:
- Object Oriented JavaScript, JS Patterns
- Template engine (Handlebars, Mustache)
- Server-side technologies (such as PHP or ASP.NET or similar)

In return we offer:
- Full-time employment and competitive salary
- An opportunity to work with the latest mobile and web technologies and take part in complex, innovative projects
- Very attractive work environment in Belgrade, at the prime location
- Clear development and career path

We will contact shortlisted candidates only.
