

## Frontend Software Developer

### Your Duties & Activities

- You will be developing and maintaining internal and external consumer-facing web interfaces
- You will work closely with our UX experts to implement websites based on provided mockups (using Figma)
- You will be collaborating with Backend developers to integrate new features and any fixes that may be required
- You will be collaborating with our QA team to ensure the highest level of code quality
- You will stay up to date with emerging technologies that can help improve the business
- You will be expected to provide estimates based on requirements, participate in code reviews to improve overall team's code quality, participate in periodic team meetings and assist other team members with technical issues that may arise

### Qualifications & Experience

#### Essential

We expect you to have a proven track record of development and delivery of production grade software using:

- HTML, CSS, SCSS
- JavaScript / TypeScript
- Angular
- WebSockets, Service Workers
- Experience with GIT
- A good knowledge of English, both written and spoken

It would be great if you have:

- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used behind the frontend.
- Experience using React (next.js)
- Experience using Tailwind or similar utility CSS frameworks
- [ASP.NET](#) MVC, C# familiarity
