

With over 15 years of experience in the area of software development we have established long-term relationships with our clients. They trust our decisions and value our propositions. During the last two years we have grown from 140 to over 260 great people and we keep going. Join one of the biggest software development companies in the region and become a member of our daily-growing team.

Our clients are world leaders in their business areas. Our projects include object oriented software development, database design and mobile platforms. Also, our functional and performance testing expertise is highly valued by our clients. Our core values: partnership, innovation and respect, represent our business approach so as our employee focus.

Due to strong demand for our services, we are looking for:

Full Stack Java Engineer

You will work with a team that works with one of the major ICT companies in the world. As a FrontEnd Engineer you will be responsible for designing, developing, testing and maintaining code for a product that will be visible to millions of users world-wide. The successful candidate is supposed to demonstrate excellent communication skills, is knowledgeable of Agile/Scrum principles, and knows the true value of teamwork. The candidate will also be comfortable learning frameworks/tools across the entire tech stack (JS, Flex, HTML, Java ...).

We take good care of our people, this is what we offer:

- Participate in projects where your opinion will be valued
- Enjoy the pleasant working environment, have fun and play
- Take full ownership of your career and benefit from our development opportunities

But we set the bar high, here is what we expect:

- Proficient knowledge of Java, 2+ year of experience with Java development
- Interest in Java and JavaScript frameworks, Adobe Flex and HTML5
- Experience with SQL and relational databases
- Understanding of common design patterns and engineering practices
- Passion and initiative for continual learning about new technologies and development approaches
- Good written and verbal communication in English

The Following skills will be considered an advantage:

- Solid knowledge of JavaScript and JQuery
- Experience with HTML5 and CSS3
- Experience with XML and JSON-based communication protocols
- Unit and performance testing know-how
- Being knowledgeable in front-end development and UI/UX design
- Experience with Android development
- Familiarity with Agile/Scrum methodologies
- Experience with source control systems (Git, Perforce, etc.)

If you are interested in this position and you have the required qualifications, please send your

CV via email to posao@pstech.rs. Please note that due to large number of applications we receive, we will only contact those candidates that are selected for an interview. Thank you.
