Future Experts: The Junior Developers Program

Are you looking for an opportunity to kickstart your career by using cutting-edge technologies and best coding practices?

If your answer is positive, you are in the right place. This is an extraordinary opportunity to build a rewarding career at **Symphony**. Working in highly collaborative teams for world-leading clients, well nurture your talent in a culture that values you. Whatever your work and life goals, we'll help you achieve them. Sooner.

Future Experts: The Junior Developers Program is driven by a single focus - to find great engineers who will make a difference. We're looking for the brightest and most innovative undergraduate students and/or junior developers who want to grow their careers within Symphony. You will work on our projects and gain valuable work experience by creating software solutions using the latest technology stacks.

We provide a collaborative environment offering support, mentoring, and guidance each day! Our clients include two of the "Big Four" tech companies, innovative startups from the Bay Area, and leading enterprises from diverse industries. Symphony is a partner and preferred vendor of Google Ventures, StartX, and Y Combinator. We like to tackle challenging projects in fields such as biotech, machine learning, IoT, wearables, and augmented reality.

symphony

Who are we looking for?

We'd be happy to know that you have:

- Basic knowledge of object-oriented programming

- Education background in IT, Computer Science or similar

- One or two mini web projects done on your own

- Passion about cracking challenges in tech

- Eagerness to explore opportunities in the tech and business world

- Experience in Python is a plus

APPLY HERE!

Applications are open until **19 March 2021** (until midnight)! If you have any questions, get in touch with our **Aida** or **Edita**.
