

With almost 20 years of experience in the area of software development we have established long-term relationships with our clients. They trust our decisions and value our propositions. During the last two years we have grown from 140 to over 300 great people and we keep going. Join one of the biggest software development companies in the region and become a member of our daily-growing team.

Our clients are world leaders in their business areas. Our projects include object oriented software development, database design and mobile platforms. Also, our functional and performance testing expertise is highly valued by our clients. Our core values: partnership, innovation and respect, represent our business approach so as our employee focus.

Due to strong demand for our services, we are looking for:

C++/Java Software Developer

You will be a part of a team that works on a long-term project for one of the biggest companies in the world. Your code will be an essential part of the server that provides rich set of real-time communication services (such as instant messaging, presence information, data sharing) for thousands of clients all over the world.

As a C++/Java Software Developer you will need to be up to date with the latest innovations in C++ and/or Java language, have broad interest and knowledge in various disciplines and possess verbal/written communication skills. This is an excellent opportunity for an engineer to gain an invaluable experience. We are looking for intelligent and sharp candidates that are hungry for knowledge and growth. Don't miss the opportunity to work in a casual, yet professional environment with smart and talented people.

We take good care of our people, this is what we offer:

- Participate in projects where your opinion will be valued
- Enjoy the pleasant working environment, have fun and play
- Take full ownership of your career and benefit from our development opportunities

But we set the bar high, here is what we expect:

- Knowledge of **at least one** of the above mentioned programming languages.
- At least **two years of experience** in relevant fields
- Knowledge of OOP principles
- Knowledge of network protocols
- Strong analytical skills (understanding of someone else's code, debugging)
- Advanced level English language

Following skills will be considered an advantage:

- Knowledge of relational databases
- Knowledge of both C++ and Java
- Linux OS
- Scripting (Python/Bash)
- Java web applications (JSP/Struts/Spring/Play) and servers (Tomcat)
- Agile/Scrum methodology of software development
- Systems for source code control

If you are interested in this position and you have the required qualifications, please send your CV via email to posao@pstech.rs. Please note that due to large number of applications we receive, we will only contact those candidates that are selected for an interview. Thank you.
