

With over 15 years of experience in the area of software development we have established long-term relationships with our clients. They trust our decisions and value our propositions. During the last two years we have grown from 140 to over 260 great people and we keep going. Join one of the biggest software development companies in the region and become a member of our daily-growing team.

Our clients are world leaders in their business areas. Our projects include object oriented software development, database design and mobile platforms. Also, our functional and performance testing expertise is highly valued by our clients. Our core values: partnership, innovation and respect, represent our business approach so as our employee focus.

Due to strong demand for our services, we are looking for:

Java Software Engineer

You will be a part of a team that works with one of the major ICT companies in the world. As a Java Software Engineer you will be responsible for designing, developing, testing and maintaining code for a product that will be visible to millions of users world-wide. The successful candidate is supposed to demonstrate excellent communication skills, is knowledgeable of Agile/Scrum principles, and knows the true value of teamwork. The candidate will also be comfortable learning and applying new technologies.

We take good care of our people, this is what we offer:

- Extremely interesting projects
- Skilled teammates with diverse backgrounds and interests
- Casual and relaxed, yet professional working environment
- Flexible working hours and a steady job
- Career, personal development and more

But we set the bar high, here is what we expect:

- Minimum 2+ years of hands on development, design and coding experience with Java
- Strong understanding of OOP principles, design patterns and engineering practices
- Knowledge of Web communications protocols and technologies
- Experience in writing unit tests (JUnit, TestNG...)
- Strong learning, analytical and problem solving skills
- Good verbal and written communication skills in English

The Following skills will be considered an advantage:

- Experience with Apache HttpClient (HTTPComponents)
- Reliable knowledge of HTML5 and CSS3
- Experience of the complete product development cycle, use of source code versioning systems (Git, Perforce, SVN, Maven, etc.)
- Being knowledgeable in front-end development
- Experience with Continuous Integration (Jenkins, etc.)
- Performance testing know-how
- Familiarity with Agile/Scrum methodologies

If you are interested in this position and you have the required qualifications, please send your CV via email to posao@pstech.rs. Please note that due to large number of applications we receive, we will only contact those candidates that are selected for an interview. Thank you.
