

*PSTech is a software development company from Belgrade, Serbia. We are constantly growing and expanding and our 240+ engineers live and breathe technology every day. PSTech combines knowledge, experience and personal skills with top-notch technologies and delivers positive change and advancement. We are committed to building a world-class technology company where engineers love to work.*

We are looking for creative people to join our team on the following position:

## **Senior Software Quality Assurance Engineer**

You will lead a team that will work with one of the major ICT companies in the world. As a Senior Software Quality Assurance Engineer you will have to promote and display initiative and innovation, have strong research practices and deliver high quality deliverables, on time and budget. You will need to be able to work in an agile development process and employ best-in-class testing practices. Additionally, you'll need to be detail-oriented and thorough in your approach to research methodology, but flexible enough to work within time and product constraints.

Your responsibilities may include any of the following:

- Bug life cycle management – defect tracking, defect reporting, defects analysis and defect verification
- Quality judgments and recommendations
- Software requirements review
- Test plan and test cases creation
- Black box/white box testing
- Manual & automation testing
- Functional testing
- Performance, load and stress testing
- Security testing
- Coordinating and communicating between different geo-located teams

Additionally, you will have to demonstrate:

- Good report writing skills
- Very good people management skills
- Ability to interview people and make “hire/no hire” proposals
- “Lead by example” attitude
- Eagerness for continuous improvement and acquiring new expertise in process and tools

## **We take good care of our people, this is what we offer:**

- Extremely interesting projects
- Skilled team mates with diverse backgrounds and interests
- Casual and relaxed, yet professional working environment
- Flexible working hours and a steady job
- Career, personal development and more

## **But we set the bar high, here is what we expect:**

- 5+ years related experience as a software quality assurance engineer (or similar)
- A Bachelor's Degree in computer science, engineering, mathematics, or equivalent
- Strong technical background
- Excellent understanding of software development lifecycle and QA cycles
- Strong Knowledge of OOP and Automation Tools (Java/Selenium, Python, etc.)
- Experience with testing client-server and web applications
- Experience with testing on different platforms (Windows, Linux, Android)
- Familiar with Scrum methodology and framework
- Good knowledge of English language
- Good leadership and communications skills
- Team work

## **Following skills will be considered an advantage:**

- Should have sound knowledge in networking fundamentals
- Strong SaaS domain knowledge is important

If you are interested in this position and you have the required qualifications, please send your CV via email to [posao@pstech.rs](mailto:posao@pstech.rs). Please note that due to large number of applications we receive, we will only contact those candidates that are selected for an interview. Thank you.
