

## **Why work at Cloud Horizon?**

Cloud Horizon is a Montreal-based software development studio with an office in Belgrade. We work exclusively with innovative North American startups that are solving interesting and challenging problems.

## **Job Description**

We are looking for a Junior PHP developer to join our growing team in Belgrade. Your job will be to work with startups to build systems that solve complex business problems. If you want to work with a young and dynamic team that constantly experiments with new and better ways of building products, then this position is for you!

## **Key responsibilities**

- Building fast, scalable, and well-designed web and mobile web apps
- Working with our clients to solve key business issues
- Maintaining existing codebase, including troubleshooting bugs and adding new features

## **Skills & Requirements**

- 1+ years of experience in PHP development
- Good knowledge of PHP and MySQL
- Experience in at least one MVC framework
- Object Oriented Programming skills
- Some knowledge of front end technologies such as HTML, CSS, jQuery, AJAX
- Git or other subversion control tool
- Good English speaking and writing skills
- B.S. in Computer Science or equivalent experience

## **Bonus skills**

- Some experience with Laravel
- Developing REST API's
- HTML5 and CSS3

## **Benefits**

- A competitive salary with regular performance bonuses
- Awesome team and great working atmosphere
- Flexible working hours
- A wide selection of international coffee and tea
- Mentoring sessions with some of the top PHP developers in Serbia
- And more
