Junior PHP Developer

Full Stack Developer

About Piktogram

Piktogram is a custom software development company. We do fully customized software solutions to meet the complex and unique business challenges that companies face today. We work closely with their team to understand their present system and to determine if it can be improved and expanded upon or if completely new software makes the most sense and must be created.

Position Description

A Full Stack Developer is responsible for front and back-end web development. This position requires you to understand the skills and responsibilities needed for the specific project and ongoing work. We offer working time of 6 hours per day in Belgrade office, no stress, no agile, no deadlines... Full zen environment.

Requirements

Bachelor degree in engineering/computer science/mathematics or minimum 2 years of working experience as a developer
Knowledge of the fundamentals of data structures, algorithms, design patterns
Experience with PHP, HTML, CSS, Javascript, Mariadb/MySQL and Git
Excellent problem-solving skills, critical thinking
Solid knowledge of English language

How to apply

Send your CV in PDF format (without motivation letter) to office@piktogramstudio.com. Deadline for applying is February 28, 2019. Provide contact info in CV document.
