

Mobile Application Tester

Company Introduction

Innotech Global was founded with one goal – to become the leader in the field of business while providing our clients with high quality solutions to suit their needs. We're a dynamic team of young professionals ready to tackle any challenge client's ideas throw at us. With an executive team who has more than 50 years of combined experience, we have taken the knowledge we gained working for others and have created our own business. We want to innovate the way people do business with our offerings of mobile phones, software development, web and mobile applications and interactive display technologies.

Our company ethics are something that we're very focused on. Respect the customer and his needs. Be respectful towards your coworkers. Solutions that we offer will always be of high quality and reliability. Strive to learn something new and improve yourself.

Job Description

Our office in Belgrade is looking for a Quality Assurance team member with 1+ years of work experience with regards to mobile handset applications who will be in charge of helping assess and test mobile handset applications in order to identify problems and their causes. The ideal candidate should be familiar with creating and reviewing test plans and executing test cases and should be working closely with front and back-end development, other testers and app development team. Candidate must have excellent attention to detail and be able to multitask.

Responsibilities

- Testing applications both native iOS and Android apps and browser-based platforms. (on real devices and simulators)
- Design Test Plans, scenarios, scripts or procedures.
- Identify, analyze and document problems.

- Monitor bug resolution efforts and track success.
- Participate in product design reviews to provide input on functional requirements, product designs, schedules or potential problems.
- Collaborate with other team members and stakeholders.

Skills And Qualifications

- Be a self-starter, have strong communication skills, and have a high degree of follow through regarding completing their assignments.
- Familiar with such platforms as Android and iOS.
- University Degree (Computer Science, Mathematics or equivalent).
- Having experience with test tools or programming languages (Ruby on Rails, Node JS or iOS and Android) is a plus.

Requirements

- Location Belgrade
- Full time job availability
- English language knowledge for communication purposes with other team members
- Availability to work over-time (or in shifts) due to time zone difference
- At least 1 year experience in working environment
