

PHP DEVELOPER

Two Desperados is a small team of experienced people. Our main focus is video games development since 2011. We are looking for highly motivated PHP developer, with an excellent understanding of OOP and some of high-level programming languages.

You are passionate about programming and interested in implementing your creative ideas into practice? You would like to cooperate with already formed team of talented individuals? Check out the position details:

MINIMUM REQUIREMENTS:

- 2+ years of experience working with PHP OOP
- Ability to write "clean" and well designed code
- Experience in DB design and SQL
- Object Oriented Analysis and Design techniques
- Good knowledge of HTML5, CSS3
- JavaScript programming experience, including jQuery and Ajax
- University degree in Computer Science is preferred
- Good English written and verbal communication skills

BENEFITS:

- Permanent employment in our office in Belgrade, Serbia
- Challenging tasks in a highly professional environment
- Making a product that will affect large group of people
- Agile development process
- Working in a team of people who are dedicated and passionate about what they do

We expect the contribution to development of our products and expanding boundaries. Main responsibilities for this position are development of PHP structures , adding the functionalities and testing.

If you believe you meet our requirements, please submit your CV with portfolio at jobs@twodesperados.com. Please note that CV without portfolio won't be considered.
