

# QA Specialist

in Belgrade office

## You are welcome to apply if:

- you are looking to boost your career by working on significant projects
- you understand the importance of QA role in software development
- you view challenges as opportunities for self-improvement and professional advancement
- you take ownership and initiative to ensure the software entrusted to you meets the highest quality standards
- you are self-reliant and proactive: you look for solutions rather than excuses
- you are able to be both detail-oriented and grasp the “big picture”: understand how the software provides business value to the client and make sure that value is delivered
- you have excellent communication skills
- you have at least 2 years of experience in a similar position

## Your daily work will include the following tasks:

- create and update test documentation (test cases, test reports) based on the system requirements, as well as user documentation, when needed
- perform functional tests, create comprehensive bug reports and follow-up their resolution with developers
- work closely with system analysts to acquire in-depth understanding of functional specification
- work closely with developers to ensure their work is carried out in accordance with the schedule and quality requirements
- provide work estimates and timely feedback for scheduling purposes

## Prerequisites for a successful candidate:

- at least 3 years of quality assurance experience
- good SQL knowledge

- experience in testing web based products
- fair knowledge of test methodology, test procedures, creating test documentation (test plan, test cases)
- experience with automated testing tools (JMeter, Selenium) is an advantage
- experience with testing Mobile Applications is an advantage
- verbal and written communication skills in English

### Company offers:

- international environment
- growth potential
- projects which are ambitious undertakings for the client and have significant impact
- an opportunity to contribute to a system creating substantial monetary and business value
- the chance to join a team working with a diverse set of modern technologies
- excellent working conditions and equipment
- competitive salary and performance-based bonuses
