

SAP Technical Project Manager / Business Analyst

Job location: Belgrade

I Job Description

The SAP Technical Project Manager is responsible for the proper execution of the project. He defines the milestones of each phase and makes sure that the project plan has the right granularity. This planning has to be aligned with the Avnet team and any change to the plan has to be communicated immediately.

He is also responsible to clean up any roadblocks during execution. This might be misunderstandings in the specification, communication problems or technical obstacles. To do this he needs to establish a project and communication structure that includes the different parties involved. This might be Avnet SAP team, Avnet EE, Avnet business, Avnet B2B, Avnet Infrastructure, Avnet BI, Avnet SAP basis or external partner if required.

He will be involved right in the beginning of a project when the functional specification is converted into a technical specification.

II Tasks and Responsibilities

- Defines the project plan for a specific project and makes sure that the solution is delivered on time
- Understands different business process scenarios and how they could be transferred into the SAP ERP world, supports the SAP architect
- Establish the communication to the different stakeholders at Avnet to clarify open topics
- Acts as the official contact of Brezna for a specific project

III Know How and Other Skills

Technical Skills

- Strong process knowledge, encompassing SAP customizing for SD & MM Modules with hands-on experience in a complex SAP R/3 system
- Excellent SAP ABAP and Application Analysis skills
- Strong analytical, problem-solving and conceptual skills
- Good overall IT background about custom SAP solutions

Soft Skills

- Very Good project management skills.
- Experience in working with distributed teams
- Ability to communicate with business and IT user
- Excellent oral, written and presentation skills

V Prerequisite to the Position

Education:

- Degree in Computer Science, Business Administration or equivalent experience.

Professional Experience:

- At least five years of experience in SAP ERP application consultancy and/or SAP project management
- Good understanding of the module SAP logistics modules SD and MM. PP and WM would be a bonus

Special Skills:

- Working systematically and in High Quality.
- Leadership qualities.

Languages:

- English
