

## Senior Android Developer

We are a product design and development studio working with ambitious, world class entrepreneurs as well as innovative Fortune 500 companies. Our solutions span from machine learning systems, marketplaces, advanced mobile applications, e-commerce platforms, video processing engines and wearable. We work with companies which are making a difference on a global scale by creating new products and services faster and cheaper based on the latest technologies and startup methodologies. Our company has offices in Sarajevo, Amsterdam and San Francisco, where majority of our clients is concentrated.

## Senior Android Developer

Currently we are looking for highly talented software engineers with development experience on Android platforms to help build mobile applications while coordinating with a team of internal and external engineers. The role of Senior Android Developer implies design, coding, implementing user interfaces, working with network services, and other challenging tasks.

### **Your roles and responsibilities would include:**

- Producing top tier code
- Recommending improvements to technology landscape and document constraints in app development
- Designing and building advanced applications for the Android platform
- Exploring the more complex edges of the Android technology stack
- Communicating and following best practices for mobile development

### **Desired skills and qualifications**

- 2+ years of software engineering experience
- Android application development using Android SDK
- Expert knowledge of Android Studio, Java 7+, Google SDKs for Android
- Experience with Google Play app store approval & distribution process
- Expert knowledge of Object Oriented concepts
- Strong grasp of GIT version control

### **Key competences we value**

- Result orientation
- High motivation for continuous learning and development
- Learning agility
- Proactive and initiative taking mindset
- Credibility, integrity, professionalism

- Focus on excellence
- Adaptability and flexibility

### **Why should you consider joining DevLogic?**

**Interesting and challenging projects and clients:** We are the team of highly motivated, innovative developers working on cutting edge projects, influencing the future of technology. Our clients are successful global companies from different business areas. We also closely cooperate with the global academic community.

**Work environment:** Highly motivated team of experts, together with incredible working space create inspiring, dynamic and energetic environment resulting with great new ideas and products.

**Learning and development:** The projects we are working on, our clients and our environment are dynamic, modern, challenging. Working in DevLogic implies continuous and comprehensive learning process that enables us to be capable to follow innovations and technological challenges of the future.

Encouraging growth and development of our people is one of the most important missions of DevLogic.

**Compensations and benefits:** In our business, we provide high quality for our clients, while also aiming to provide high quality work conditions for our employees - environment where people will feel happy, satisfied and productive. We provide competitive compensation packages that meet the needs of our employees, with benefits like our own gym, game areas, living room, happy hours, team buildings, daily refreshments (coffee, tea, fresh fruit..) etc.

If you are interested to join our precious team, we encourage you to share your background, interests and ambitions with us. Contact us via option PRIJAVI SE. We are waiting for your applications!
