SENIOR MOBILE APPLICATION DEVELOPER

(Location: Belgrade)

Job Description:

- Acting as mobile application developer; Depending on the skills set can work on Android or iOS and play a supporting role across the other platform(s)

- Working closely with another mobile app developer leading the other platform development

- Deliver across the entire app life cycle –concept, design, build, deploy, test, release to app stores and support

- Work with outside data sources and API's such as REST APIs

- Working directly with developers and product managers to conceptualize, build, test and realize products

- Gather requirements around functionality and translate those requirements into elegant functional solutions

- Build prototypes at tech scoping stage of projects

- Working along the web developers to create and maintain a robust framework to support the apps

- Working with the front end developers and graphic designer to build the interface with focus on usability features

- Create compelling device specific user interfaces and experiences

- Standardizing the platform and in some cases apps to deliver across multiple brands with minimal duplication of effort

- Troubleshoot, optimize and performance tune the apps

- Innovate and brainstorm new features

- Explain technologies and solutions to technical and non-technical stakeholders

- Attend industry events/ conference – both attending and presenting

- Keep up to date on the latest industry trends in the mobile technologies

Candidate Profile:

- 2+ years of experience in application development on Android and 3+ years in Java/C++

- Published a minimum of 5 apps available on GooglePlay

- Strong OO design and programming skills in Java (J2EE/ J2ME)

- Experience with Android SDK

- Knowledge of SQLite, MySQL or similar database management system

- Ability to understand and parse XML, JSON and serialized data

- Understanding of Multi-threaded interface design

- Experience with Fragment based Android application architectures

- Thorough knowledge of IntelliJ or Android Studio

- Experience dealing with streaming media on Android

- Familiar with JNI

- Knowledge of some of the source code versioning systems (Git, Perforce, Mercurial, SVN, CVS)

- Experience developing for iOS, Windows Phone, BlackBerry or J2ME

- PHP frameworks

- Creative design skills
