

Manpower is a worldwide innovative forerunner and leader in the field of employment through the provision of services and workforce management solutions for clients and helping people in their career development with the aim of understanding the needs of the clients and candidates in the changing world of work.

On behalf of our client, reputable international company, Manpower Serbia is searching for a motivated candidate to take the challenge and to successfully fulfill the position of:

SENIOR WEB (UX) DEVELOPER

(Location: Belgrade)

Job Description:

- Work closely with managers and software engineers
- Translate business requirements, customer feedback and real world workflows into digital experiences
- Conduct research with subject matter experts and selected users
- Create compelling designs and structured layouts across a diverse range of touch points that are both optimized for performance and user experience
- Designing all aspects and scenarios of the customer journey from the core journey to specific edge cases and error messaging
- Experience creating prototypes of different fidelities
- Define reusable interaction patterns
- Establish and promote design guidelines, best practices and standards via a component based library. Validate designs through usability testing
- Design and Produce Visual Design deliverables and screen mock-ups
- Work with a multi-disciplinary team to evaluate the feasibility of proposed solutions, and proactively manage time and deadlines. Ability to document designs in a way that they can be shared and understood with other departments
- Create wireframes, storyboards, user flows and site maps to effectively communicate interaction and design ideas

Candidate Profile:

- 3 + years of (web) UX/UI design
- Demonstrable UI design skills with a strong portfolio
- Solid experience in creating wireframes, storyboards, user flows, process flows and site maps
- Excellent knowledge of Adobe CS Suite (Photoshop, InDesign, Illustrator, Fireworks, Dreamweaver, etc)
- Very strong HTML, CSS3 and jQuery knowledge, including responsive design and progressive enhancement
- Hands on experience working on large web based applications
- Understanding of modern JavaScript frameworks such as Knockout, Angular and ExtJS
- Excellent Visual design skills with sensitivity to User-System Interaction
- Ability to present designs and speak confidently about your solutions to various stake-holders
- Ability to solve problems creatively and effectively
- Up-to-date with the latest UI trends, techniques and technologies
