

## **Short about the P3**

We manage projects and reorganize company processes in automotive, aviation and telecommunication industries. Established 1996 as spinoff of the Fraunhofer Institute of Production Technology Aachen we are now more than 2,500 P3 team-members at 35 locations worldwide.

P3 offers worldwide technical consulting and services for the telecommunications industry. As a leading international company we work for established network operators, suppliers, device manufacturers and regulatory authorities since 2001.

For our team in Belgrade - Serbia, we are seeking:

# **Big Data Analysis (mf)**

**Location: Belgrade**

## **Job Description:**

We are looking for an user experience designer with strong interests and capabilities in the design and development of engaging user experiences. The ideal candidate will thrive in a work environment that requires strong problem solving skills and independent self-direction, coupled with an aptitude for team collaboration and open communication. This individual excels at providing both highly analytical as well as highly creative ideas to a design engagement. The candidate will also have extensive experience in a fast-paced and innovative development environment. A thorough understanding of contemporary user-centered design methodologies is a must.

## **Your responsibilities:**

- Identification and specification of customer requirements
- Development and design as well as implementation of individual solutions for handling big amounts of data
- Use a variety of different tools offered by the Hadoop ecosystem with the goal of implementing a scalable solution using cluster resources in a most efficient way
- Execution of data extraction and aggregation
- Testing of deliveries by implementing and controlling automated tests
- Identification of market trends that contribute to the P3 setup and help to create smarter solutions

## **Your qualifications:**

- Master's degree in computer science, physics/mathematics or related discipline
- Professional experience in a comparable position for several years
- Good knowledge in Java

- Experienced in working with big data in the Hadoop ecosystem
- Interest in new technologies and exploring upcoming possibilities in Hadoop
- Solution-oriented way of working
- Good command of English, German is an advantage

**Your benefits:**

- An interesting, diversified and challenging working environment in a highly motivated and international team
- Exciting projects for prestigious customers
- Personal and professional development opportunities from the start
- Flexible working conditions

**We are looking forward to meet.**
