A thorough understanding of contemporary software development methodologies is a must.

Key Skills and Experience:

- Strong attitude towards personal improvement
- Previous experience with development in web frontend, Android and/or iOS development is a plus
- Experience with software engineering and good knowledge of web/iOS/Android technologies and concepts (e.g. Android/iOS APIs)
- Executing software/app conceptualization and development as a part of a multi-disciplinary team
- Collaborating on application planning with a lead experience architect
- Consulting with clients and lead experience architect
- Researching trends and in mobile applications
- Researching technology trends
- Performing other duties as assigned

Further Requirements:

- Strong conceptualization ability and strong technical communication ability
- Exceptional programming skills, production value and code optimization skills
- Strong working knowledge in cross-platform mobile development frameworks
- Experience with hardware integration like Beacons, wearables, etc.
- Experience in Linux system environments
- Strong written and verbal communication skills
- Understanding of common software project management practices
- Understanding of common software development practices

Additional:

- Experience in UI/UX design practices
- Strong working knowledge of HTML, CSS, Rails, JavaScript/JQuery, ObjectiveC (iOS), C++, C#, Java, Transact-SQL, Bootstrap, ASP.net, XML.
- Bachelor's or Master's degree in computer science, informatics or related field
- Knowledge in UML
- Occasional travel is required

We offer:

- Newest technologies
- An interesting, diversified and challenging working environment in a highly motivated and international team
- Exciting projects with prestigious mobile network operators
- Our open company structure, with flat hierarchy and fast decision making, offers very good personal development perspectives
- Flexible working conditions

We are looking forward to meet.
