TECHNICAL CONSULTANT

You will be part of small to medium sized project teams focused on client & Product deliverables, with some autonomy, supporting the whole life cycle.

As guided by client requirements and the desired direction of the Product develop functional and architectural enhancements.

Typically including:

Development

1. Analysis and capture of client and internal requirements, mostly related to ATM's
2. Development of functional solutions
3. Designing new solutions in the existing framework
4. Developing new ATM transactions in the existing framework.
5. Developing new audit and maintenance procedures in the existing framework.
6. Software development using Java technologies and relational databases
7. Unit and integration testing
8. Documentation

Implementation

1. Analysis and capture of business requirements and processes
2. Configuration of ATM driving system which means setting up data about ATM and setting up write commands, for any ATM vendor.
3. Configuring cryptography keys for the ATM.
4. Configuring screen update, receipt and journal data.
5. Configuring different ATM transactions in the existing framework.
6. Configuring audit procedures and monitoring and maintenance procedures for ATM groups in the existing framework.
7. Extending business logic and rules
8. Data manipulation

Deployment

1. Working alongside the client team deploy the application(s) into the client' environment:
 1. Consultancy
 2. Training
 3. System testing
 4. Certification with external bodies (e.g. Visa, MasterCard, Link)

Support

1. Receiving and handling of raised issues post deployment either as part of warranty or ongoing maintenance:
 1. Incident recording, initial investigation and clarification
 2. Incident resolution, perhaps by passing on to others

3. Patch production and deployment

THE TECHNOLOGY

Authentic is an Open Development payment platform most often used for high-availability, high-performance payments applications. It can accept transactions from any device, source, or system, map these into different formats, authorize and authenticate them, and then route them to any destination.

With this product, we help our customers to run thousands of millions of transactions using tens of datacenters in Asia, Africa, North America, South America, Europe, and Australia.

THE EXPERIENCE

Work with the latest technologies, in a friendly and open atmosphere, to help our customers to run their payments transactions. In Professional Services, you will be able to interact with our new customers, understand their problems and find solutions to real-life challenges. For that, you will learn how our complete product works and how to tackle different obstacles without ending up being over-specialized.

You will have the possibility of a highly visible role, with real responsibility and independency, where your efforts and successes will be noticed by both customers and senior management.
