WEBIUS
GROUP

Webius Group is a startup that attracts creative and reliable professionals that strive to create distinctive value for its partners. We believe in personal growth and constant improvement of each individual member of our team. We do things differently.

If you're ready to learn and develop professionally, want to grow and be challenged in your career, and make an impact you can see in your company, this is the opportunity for you!

Responsibilities:

- Design, development, deployment and maintenance of web applications
- Create technical specification requirements and plan new projects
- Troubleshoot and test web applications and databases
- Work with agile development methodology
- Contribute in all phases of the development lifecycle

Desired skills and experience:

- Demonstrable knowledge of web technologies including HTML, CSS, JavaScript, AJAX etc.
- Knowledge of relational databases, version control tools
- Understanding of object-oriented concepts and design pattern
- Passion for best design and coding practices and a desire to develop new bold ideas
- Ability to realistically evaluate the scope and time of a presented task
- Fluent written communication and strong collaboration skills
- Ability to effectively communicate in English
- Experience with other web technologies such as PHP and WordPress, RoR, Python, Java or Objective-C is a plus
- Finished BS/MS studies or on a final year in Computer Science or related field of equivalent experience
- Able to work in Belgrade or Niš.
