Now hiring:

Web Application Developer

Job Description

• Developing scalable Business Support System for online advertising services
• Developing new cutting-edge features for the online advertising business
• Integrating state-of-the-art technologies from market leaders in ad delivering (API)
• Developing interfaces for existing applications, e.g. adserver and web-analysis tools

Requirements

• You have successfully completed your studies of software engineering or similar field
• Minimum 2 years' working experience as a web application developer
• Your knowledge of PHP (object-oriented) and experience handling MySQL, (x) HTML, CSS and JavaScript are excellent
• You possess very good skills with Ajax, jQuery, SVN, Smarty or other template engines
• Your analytical skills and ability to abstract are in high gear
• You are a self-motivated person and would enjoy being part of a dynamic development team in a successful and stable tech company
• Team spirit is very important to us, so we expect a strong team player to join us
• Your English is fluent

What We Offer

• A great team of experienced software engineers and professionals for productive exchange and inspiration
• An exciting and trend-setting challenge in a high-growth company
• Very nice location and working atmosphere
• Many opportunities to master your skills and explore your professional goals
