iOS Software Developer (Audio, Connectivity, Internet of Things)

We are expanding our team of developers already involved in the process of creating best-in-class mobile experience for users. As an iOS developer you will be a part of a team that works for one of the largest ICT companies in the world, embracing the latest technologies from Apple and helping shape the Internet of things. You will work in a vibrant environment pushing audio, connectivity, and mobile apps to the limit, and employ advanced development practices.

Qualified candidates will possess experience with Objective-C development for iOS and with object oriented programming, experience with client application development and verbal/written communication skills, and will work on extremely interesting project that combines top technologies.

Job Responsibilities:

- Extremely interesting projects
- Skilled team mates with diverse backgrounds and interests
- Casual and relaxed, yet professional working environment
- Flexible working hours and a steady job
- Career, personal development and more

Desired Skills and Experience:

- At least 2 years of hands-on experience with iOS application development
- Excellent knowledge of Objective-C programming language
- Experience with Cocoa/Cocoa Touch Frameworks
- Object Oriented Analysis and Design techniques
- Knowledge of Mac Design Patterns and MVC
- Good debugging/problem solving abilities
- Passion and initiative for continual learning about new technologies and approaches
- Excellent Verbal and written communication skills in English

Following skills will be considered an advantage:

- Experience with Android development
- Experience with Agile/Scrum methodologies
- Good Linux skills
